*ARPRO 5152 ESDP is also engineered for on-site expansion to lower bulk densities, starting at 20g/l.

**ARPRO 5253, 5253 RE and 5275 require further expansion on-site, prior to moulding. Achievable density range depends on pressurisation and process.

Shrinkage, surface aspect and cycle time are influenced by process parameters, tool and equipment layout, and part geometry.

ARPRO is a registered trade mark.
